June 2020

Transcript of Results

I certify that **R. Visser** of **Magdalene College** has passed the examination for Part III of the Mathematical Tripos in June 2020 and is entitled to the award of the Master of Advanced Study degree.

The candidate obtained a mark of 90.8% on the examination, and the detailed results are as follows:

Paper	Units	Mark %
Elliptic Curves	3	87
Modular Forms and L-Functions	3	87
Analytic Number Theory	3	93
Essay: Large Gaps Between Primes	3	96

Dr Stephen Cowley
Chair of Part III Examiners 2020

Context

The Part III course is intended as a preparation for research in mathematics and leads to a master's degree by examination. Students who take it as the fourth year of a specialised mathematics course in Cambridge receive the degree of Master of Mathematics. Graduates of other universities with a similar level of preparation who take Part III as a stand-alone taught master's course receive the degree of Master of Advanced Study. The great majority of those taking the course obtained First Class Honours or the equivalent in their previous examinations.

The degree is awarded on the basis of an examination which takes place in the Easter term. Each paper in the examination carries either 3 units or 2 units of credit, corresponding to a 24-hour and 16-hour lecture course, respectively. Students may also offer an essay which carries 3 units of credit. In a normal year, the Part III Examiners aggregate the marks obtained on each paper (including the essay) and award to each candidate a Distinction, Merit, Pass, or Fail. According to the University's Statutes and Ordinances, the pass level is equivalent to an Upper Second-Class Honours degree.

In view of the severe disruption caused by COVID-19, the Faculty decided to exceptionally offer the Easter-term Part III examination as a pass/fail examination only. Students were required to submit between 11 and 13 units for the examination. The Part III Examiners subsequently aggregated the marks obtained on each paper (including the essay) and awarded to each candidate a Pass or Fail. Their decision may have been influenced by factors such as the perceived difficulty of one course relative to another or details of a particular answer which are not apparent in the marks. The Examiners are satisfied that the level of performance demonstrated by candidates who passed this examination was comparable to that required to pass the examination in a normal year.
