Primary Interest (MSC# only) *11* Secondary Interests *14, 68*

Give a very brief synopsis of your current research interests in the box below (e.g. finite group actions on four-manifolds).

My current research interests include the statistical properties of totally real fields, the arithmetic of abelian varieties and Galois representations, and the reduction behaviour of elliptic and hyperelliptic curves and their Jacobians. I also enjoy playing around with various aspects of computational and analytic number theory.
